Summary

Web Developer with a strong interest in building reliable and user-focused web applications. A quick learner with a detail-oriented mindset and the ability to work independently as well as collaborate effectively in a team environment

Skills

- **Programming Languages:** Javascript, C#.
- **Frameworks and Libraries:** Nest.js, Reactjs, .NET.
- **Databases:** Postgresql, MySQL, MongoDB.
- **DevOps/Deployment:** Docker.
- **Version Control:** Git/Github.
- **Language:** Ability to read and understand documents in English.

Education

- Duy Tan University
- Bachelor of Software Engineering
- 2022 - 2026

Experience

● Visnam Joint Stock Company (Intern Developer)

3/2025 - 5/2025

- **HRM (Human Resource Management)**
 - **Description:** Contributed to the development of an HRM system supporting employee management, leave requests, work scheduling, and role-based access control.
 - **Tech stack:** .NET, ASP.NET Core, Blazor, Postgresql
 - **Main Duties:**
 - Developed and maintained CRUD APIs for employee management, leave requests, and scheduling features using ASP.NET Core and Entity Framework Core.
 - Implemented JWT authentication and role-based access control to secure API access.
 - Worked with PostgreSQL tables, entity relationships, EF Core migrations, and validation rules.
 - Contributed to frontend and backend features for an HRM system using Blazor and ASP.NET Core.
 - Fixed bugs and supported feature development based on team requirements.
 - Collaborated with team members through Git, code reviews, and task discussions.

Project

Shiftly – Part-Time Workforce Management System

[GitHub](#) | [Demo](#)

- **Description:** Developed a full-stack platform for multi-branch businesses to manage part-time employees, schedule and approve shifts, track attendance, and estimate payroll.
- **Tech stack:** React, TypeScript, Tailwind CSS, NestJS, TypeORM, MySQL, JWT, RESTful API.
- **Main Duties:**
 - **Management Foundation:** Built management modules for branches, positions, employees, employee accounts, and reusable work-shift templates.
 - **Authentication & Authorization:** Implemented JWT authentication, protected APIs, role-based access control, and role-aware frontend routes for Admin, Manager, and Employee users.
 - **Shift Scheduling:** Developed daily and weekly scheduling features, including open shifts, employee shift registration, manager approval, and personal work calendars.
 - **Attendance Operations:** Implemented check-in/check-out, attendance confirmation, absence and shift-cancellation requests, and manager-approved shift swapping between employees.
 - **Reporting:** Built reports for total working hours, branch-based attendance, employee-based attendance, and estimated salary calculation based on approved working hours and hourly rates.
 - **User Experience & Data Handling:** Implemented request validation, search, filtering, sorting, pagination, status management, and responsive dashboard interfaces.

School Management System (Graduation Thesis)

[GitHub](#)

- **Description:** Developed a role-based school management system frontend supporting multi-school administration, academic management, and dashboards for different user roles.
- **Tech stack:** React, Tailwind CSS, Spring Boot, RESTful API, MySQL.
- **Main Duties:**
 - **Role-based Frontend:** Developed role-specific interfaces, protected routes, dynamic navigation, and dashboards for Super Admin, Admin, Teacher, Student, and Parent users.
 - **Authentication & API Integration:** Implemented client-side JWT session handling with AuthContext, localStorage, and Axios interceptors; integrated REST APIs for CRUD operations and role-aware data display.
 - **Core Management Features:** Built frontend screens and workflows for users, classes, subjects, schedules, attendance, exam scores, assignments, announcements, documents, reports, file uploads, and Excel import.
 - **Dashboard:** Created dashboard visualizations with Recharts.

Task Manager

[GitHub](#) | [Demo](#)

- **Description:** Developed a React + TypeScript task manager with Firebase Auth and Firestore, supporting CRUD tasks, priorities, due dates, overdue tracking, filters, dashboard stats, and responsive UI.
- **Tech stack:** React, TypeScript, Tailwind CSS, Firebase.
- **Main Duties:**
 - Built a Firebase-backed task management app with email/password authentication and user-specific Firestore data.
 - Implemented CRUD tasks with due dates, notes, priority levels, completion status, overdue detection, and task filtering.
 - Designed a responsive dashboard with task statistics, calendar sidebar, loading states, and toast notifications.
